## CONTROL PANEL SPECIALISTS

## RATES

A complete electrical control panel would be done on price work, quoted and built to customer specifications and requirements and done on a job to job basis.

Additional work subject to the quotation will be charged accordingly.

Our off the shelf products will cost the amount agreed with the customer and may be dependent on quantity and turnaround.

Our costing varies and a breakdown of this is shown below.

**Material costs**-should AMC add a fee to any materials bought by ourselves for the end user and/or the control panel/s, this is at our discretion. This may vary on a job to job basis. If any cost is to be added to materials, this would cover the purchasing and handling costs and disposal of packaging.

**Shop floor labour**-(in house) nominal fee as from January 2024 would be charged at £30.00 labour with an estimate to the time involved (where possible).

Additional work to the 1<sup>st</sup> issue of schematics may incur addition costs.

Changes to the specifications by the customer may incur additional costs.

**Design** – nominal fee as from January 2024 would be charged at £45.00 per hour with an estimate to the time involved (where possible).

**Software** - price would vary job to job and what is involved, minimum £450.

**Site work (day rate travelling)** – nominal fee would be £400 per person (shop floor) and £500 per person (design engineer) and £550 per person (software).

**Fuel costs** are charged at the standard GOV rate. Addition fees may be applicable dependent upon location.

**Site labour (overnight stay)** - as above, plus £150.00 per man. (depending on location).

The above rates are subject to change and may vary with each customer.

The prices stated exclude **V.A.T** which will be charged at the standard rate.
